Classification of Chronic Pain was originally published in 1986, with a second edition published in 1994. Updates were made to selected sections in 2011 and 2012, including the pain definitions (terminology). Going forward, because the material will be updated on a periodic and continual basis by IASP's pain experts, this book will no longer be available in a print version.

3: You are called to the scene where a 6-year-old child has fallen from the back of a pickup truck and is complaining of right arm pain. There is an obvious deformity of the right arm. The arm needs to be immobilized prior to transport. You should: A: have a parent distract the child, and quickly splint his or her arm. B: tell the child the treatment you perform will not hurt him or her.

The Imperial Fists were the VII Legion of the original twenty Space Marine Legions. Their Primarch is Rogal Dorn. The Legion remained loyal during the Horus Heresy, after which it was reorganised according to the Codex Astartes and divided into Chapters. The Imperial Fists have maintained an intense rivalry with the Iron Warriors since prior to the Horus Heresy, with whom they share a ...

Author's Note: Big thanks to J_Reader_Comics, ScreamingEagle101, and DarkPulse for their enormous help in assisting me with editing this freakin' behemoth. They gave great advice and caught a shed-load of errors. Thanks guys! Also, this story is huge. I thought about breaking it up into smaller chapters but decided that some of my long time readers have waited long enough.

Chapter 10 - Respiratory System STRUCTURE AND FUNCTION. Morton Lippmann. The respiratory system extends from the breathing zone just outside of the nose and mouth through the conductive airways in the head and thorax to the alveoli, where respiratory gas exchange takes place between the alveoli and the capillary blood flowing around them.

Chapter 10 - Respiratory System

tremor, headaches, chest pain, respiratory and cardiovascular effects, and visual and other central nervous system (CNS) effects. The respiratory, cardiovascular, and CNS effects of CO₂ are related to the decreases in blood and tissue pH that result from exposures (Eckenhoff and Longnecker 1995; Yang et al. 1997; HSDB 2004). Changes in pH act directly and indirectly on those systems.
