MB Research Labs specializes in predictive, 3D Tissue and cell-based in vitro toxicity assays using primary cells from many different tissues and organs. We utilize many proprietary GLP assays to allow for use in nearly all levels of drug and product development from early stage screening to pre-clinical in vivo toxicity studies.. MB Research has been a pioneer in the advancement of the 3Rs ...

In Vitro Toxicology Testing

Ocular Tissue Bioanalysis. Ocular tissue LC-MS/MS bioanalysis laboratory services supporting ocular drugs preclinical or clinical development. Intertek's ocular tissue LC-MS/MS bioanalysis experience extends over a decade in regard to development and highly optimised validation for a wide variety of compounds in multiple ocular matrices of different species which adhere closely to regulated ...

Ocular Tissue Bioanalysis - Intertek

The human eye is an organ which reacts to light and pressure. As a sense organ, the mammalian eye allows vision. Human eyes help to provide a three dimensional, moving image, normally coloured in daylight. Rod and cone cells in the retina allow conscious light perception and vision including color differentiation and the perception of depth. The human eye can differentiate between about 10 ...
