Grey Water Central The web's information central on all aspects of grey water systems from the leading innovators and producers of greywater information

Grey Water Information Central - Oasis Design: Grey Water ...

Headquartered in Tampa Florida, WRA is a multi-disciplinary engineering firm specializing in civil engineering, land development and permitting, water supply planning and permitting, environmental sciences, and military training range design.

WRA Engineering - Military Range Design | Water Resources

Best rated water softeners and water treatment systems providing pure, clean, and great tasting water for your home. Westfair Water Systems is an authorized Kinetico Dealer serving Westchester and Fairfield Counties.

Westfair Water Systems - Water Softeners For Home

About Wahaso. Commercial buildings can save millions of gallons of potable water each year by harvesting rainwater, grey water, condensate and other on-site sources for non-potable uses like toilet flushing, irrigation and cooling tower make-up.

Wahaso - Water Harvesting Solutions - Commercial Systems ...

LEED Platinum Innovation: Rainwater Capture System for "Santa Monica's Greenest Building" We are the leading environmental resource company in the world specializing in providing innovative and practical water conversational systems...

Water Recycling Systems | Renew. Reuse. Recycle Water!

Water resources are natural resources of water that are potentially useful. Uses of water include agricultural, industrial, household, recreational and environmental activities. All living things require water to grow and reproduce. 97% of the water on the Earth is salt water and only three percent is fresh water; slightly over two thirds of this is frozen in glaciers and polar ice caps.

Water resources - Wikipedia

Note: Social and economic factors are vitally important considerations, but are sub systems in the larger context of the Earth's eco-sphere. Theory. The intention of sustainable design is to "eliminate negative environmental impact completely through skillful, sensitive design". Manifestations of sustainable design require renewable resources, impact the environment minimally, and connect ...

R18-9-711. Type 1 Reclaimed Water General Permit for Gray Water. A. A Type 1 Reclaimed Water General Permit allows private residential direct reuse of gray water for a flow of less than 400 gallons per day if all the following conditions are met:

Gray Water Policy Center - Oasis Design: Grey Water Books ...

Rain protection of mass walls, and understanding the rate the wall will get wet, the amount of moisture it is capable of storing, and the drying rate become important design considerations, as exceeding the safe storage capacity for long periods of time may create long term moisture problems for the surrounding substrates that might come in contact with the mass wall.
