In mathematics, and more specifically in graph theory, a graph is a structure amounting to a set of objects in which some pairs of the objects are in some sense "related". The objects correspond to mathematical abstractions called vertices (also called nodes or points) and each of the related pairs of vertices is called an edge (also called link or line).

A graph  $H$  is a subgraph of a graph  $G$  if all vertices and edges in  $H$  are also in  $G$ . Definition A connected component of  $G$  is a connected subgraph  $H$  of  $G$  such that no other connected subgraph

of  $G$  contains  $H$ . Definition A graph is called Eulerian if it contains an Eulerian circuit. MAT230
