

Integumentary Skeletal And Muscular System Answer Key

Integumentary Skeletal And Muscular System

Skeletal, Muscular, Integumentary System. STUDY. PLAY. Terms in this set (...) A function of the skeletal system is to shape. and support the body. A function of the skeletal system is to protect. internal organs. A function of the skeletal system is to attach. to bone for movement. A function of the skeletal system is to make.

Skeletal, Muscular, Integumentary System Questions and ...

The skeletal system works with the integumentary system by producing vitamin D. Vitamin D makes bones stronger. The integumentary system is an organ system that protects the body from damage.

How do the integumentary and muscular systems work together

Integumentary, Skeletal, and Muscular Systems. The construction of the tissues of the body involves developmental phenomena at two levels of organization. One is the level of individual cells, in which the cells that make up a tissue undergo increasing specialization through a process called cytodifferentiation (see discussion of restriction,...
