1. What Is Macroeconomics? Microeconomics is the study of the behavior of individual economic agents. Microeconomics asks how individuals allocate their time, income and wealth among various opportunities for labor, leisure, consumption, and savings.

Macroeconomics - 1. An Overview of Macroeconomics

What is Gross Domestic Product (GDP)? it measures the total income of everyone in the economy "When workers have a relatively small quantity of capital to use in producing goods and services, giving them an additional unit of capital increases their productivity by a relatively large amount." This statement is consistent with the view that [...]

Macroeconomics Final Exam Questions study guide Kent State ...

Inflation means there is a sustained increase in the price level. The main causes of inflation are either excess aggregate demand (economic growth too fast) or cost push factors (supply-side factors).

Causes of inflation | Economics Help

In economics, the freshwater school (or sometimes sweetwater school) comprises US-based macroeconomists who, in the early 1970s, challenged the prevailing consensus in macroeconomics research. A key element of their approach was the argument that macroeconomics had to be dynamic and based on how individuals and institutions interact in markets and on how they make decisions under uncertainty.
