Conference Detail for Optical Measurement Systems for ...

GEOLOGY 115. OPTICAL PROPERTIES OF GEMS. Optical properties are those which are related to the behavior of light, on, or in, a gemstone. Some of these can be seen, and even quantified, with the naked eye alone.

Optical Properties of Gemstones - Gemology

Recursion (adjective: recursive) occurs when a thing is defined in terms of itself or of its type. Recursion is used in a variety of disciplines ranging from linguistics to logic. The most common application of recursion is in mathematics and computer science, where a function being defined is applied within its own definition. While this apparently defines an infinite number of instances ...

Recursion - Wikipedia

A laser is a device that emits light through a process of optical amplification based on the stimulated emission of electromagnetic radiation. The term "laser" originated as an acronym for "Light Amplification by Stimulated Emission of Radiation". The first laser was built in 1960 by Theodore H. Maiman at Hughes Research Laboratories, based on theoretical work by Charles Hard Townes and Arthur ...

Geologists like me teach students and conduct research with microscopes called "polarizing" or "pol" for short. After development in the late 19th century, pol scopes became critical tools for studying the minerals and structures of rocks (our Earth), which can tell us much about how they formed.

Polarizing Petrographic Microscopes - Earth-2-Geologists

Back to Items of Interest Sub-Table of Contents. Gain, Stability, Efficiency, Life, FB Versus DFB Laser Factors Affecting Laser Resonator Performance The following is the short list of physical characteristics of a conventional Fabry-Perot (lasing medium between mirrors) laser resonator that can affect lasing performance including power output, efficiency, beam quality, and stability:

Sam's Laser FAQ - Items of Interest

Summary. Following Hermann von Helmholtz, who described visual perceptions as unconscious inferences from sensory data and knowledge derived from the past, perceptions are regarded as similar to predictive hypotheses of science, but are psychologically projected into external space and accepted as our most immediate reality.

Knowledge in perception and illusion - Richard Gregory

...Types of mirrors and their uses. A mirror is an object that reflects light or sound in a way that preserves much of its original quality prior to its contact with the mirror. Some mirrors also filter out some wavelengths, while preserving other wavelengths in the reflection. This is different from other light-reflecting objects that do not preserve much of the original wave signal other than ...
