

Practical Management Of Dementia A Multi Professional Approach

Practical Management Of Dementia A

Dementia is an increasingly common condition in the community. On average, every general practitioner in Australia will see three new cases each year. There are strong reasons for making an early diagnosis of dementia, as this may enable families to plan ahead and to institute management that could reduce cognitive impairment and slow disease progression. | RACGP

RACGP - Dementia - an update on management

Launched in 2002, Practical Neurology is a publication uniquely dedicated to presenting current approaches to patient management, synthesis of emerging research and data, and analysis of industry news with a goal to facilitate practical application and improved clinical practice for all neurologists. Our straightforward articles give neurologists tools they can immediately put into practice.
