The history of agriculture in the United States covers the period from the first English settlers to the present day. In Colonial America, agriculture was the primary livelihood for 90% of the population, and most towns were shipping points for the export of agricultural products. Most farms were geared toward subsistence production for family use. The rapid growth of population and the ...

Alabama, like the rest of the South, experienced drastic economic and social change in the post-Reconstruction, or New South, era. The term "New South" refers to the economic shift from an exclusively agrarian society to one that embraced industrial development. Influential southerners such as Atlanta Constitution managing editor Henry W. Grady employed the term in an effort to promote economic ...

Located in the rugged hill country of northwest Alabama, south of the Tennessee River, Winston County was originally formed from part of Walker County in 1850 and was named Hancock County, before it became Winston in 1858. Its rugged terrain, characterized by hills and steep-walled gorges, together with its poor soil and unpredictable climate, made subsistence farming, rather than large-scale ...

United States - The United States from 1816 to 1850: The years between the election to the presidency of James Monroe in 1816 and of John Quincy Adams in 1824 have long been known in American history as the Era of Good Feelings. The phrase was conceived by a Boston editor during Monroe's visit to New England early in his first term. That a representative of the heartland of Federalism could ...
