The thermal conductivity of a material is a measure of its ability to conduct heat. It is commonly denoted by k , λ , or κ . Heat transfer occurs at a lower rate in materials of low thermal conductivity than in materials of high thermal conductivity.

Thermal comfort is the condition of mind that expresses satisfaction with the thermal environment and is assessed by subjective evaluation (ANSI/ASHRAE Standard 55). The human body can be viewed as a heat engine where food is the input energy. The human body will generate excess heat into the environment, so the body can continue to operate.

Does your thermal anchor pass the test? READ THE REPORT! The Thermal 2-Seal™ Wing Nut Anchor is an innovative single screw veneer tie for metal stud construction, it features a dual-diameter barrel with factory-installed EPDM washers to seal both the face of the insulation and the air/vapor barrier, and unique Thermal Wings that are designed to decrease thermal transfer through rigid insulation.

Insulation acts as a barrier to heat flow and is essential for keeping your home warm in winter and cool in summer. A well-insulated and well-designed home provides year-round comfort, cutting cooling and heating bills by up to half. This, in turn, reduces greenhouse gas emissions.

Insulation installation Installing insulation in a new dwelling or adding insulation to an existing one can make a significant difference to the comfort and energy performance of the home, but it is vital that the insulation is put in correctly. Read the article in conjunction with Insulation to find out how to install insulation in various types of construction and useful tips for achieving ...

Misleading Stuff . This excerpt comes from a industry technical bulletin, "The system R-value of R-1.95 results in an energy savings or reduction in heat loss of 56% when compared to the same concrete floor system without insulation." The Facts: Energy can neither be created nor destroyed ergo it can not be saved so the only true statement is a 'reduction heat loss' but what they don't tell ...
